JOSHUA E AG

has successfully completed the online, non-credit Specialization

Google Workspace Administration

The Google Workspace Administration Specialization has been developed to help administrators master the foundations of managing and establishing Google Workspace best practices for their organization. The courses cover account setup and provisioning and management of users, groups and resources. Management of core services such as Gmail, Calendar, and Drive & Docs are also considered. The Google Workspace Security course introduces the learner to Google's security best practices to protect users, applications and data. The specialization also introduces mail management in Google Workspace. Learners configure email compliance and learn how to protect their users from spam, spoofing, phishing and malware attacks. Finally, learners are introduced to Google's deployment methodology.
